INITIATIVE 2030

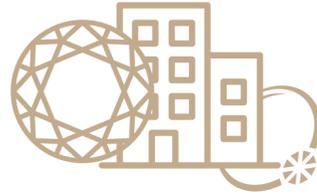

2025 marks a proud milestone - 60 Years since **THE FOUNDING OF KP SANGHVI**

From our modest beginnings in 1965 to becoming one of the world's leading family-run enterprises, our journey has been shaped by integrity, excellence, and lasting partnerships.

On 10th May 2025, as we mark 60 years of our journey, this milestone stands not just as a celebration of our legacy but as a tribute to the trust we've built and a renewed commitment to the future we continue to shape.

CLARITY

More Than a Diamond Grade

Clarity, to us, goes far beyond the characteristics of a diamond. It shapes our approach, guides our leadership, and strengthens the relationships we build—with integrity at the core.

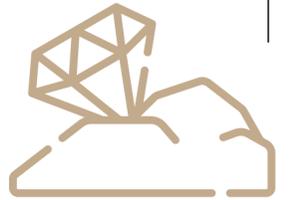

Our commitment to ethical and transparent practices begins from within. Whether it's open communication with our teams or fostering trust with our partners & customers, we believe transparency is the foundation of meaningful progress. In every action, interaction, and creation, we strive to reflect the same clarity we value in our craft: clear intentions, honest processes, and a deep respect for people and the planet.

TRACING EVERY FACET

KP Sanghvi's Traceability Journey

1965

At KP Sanghvi, trust has been our foundation since 1965. In the diamond and jewelry industry, transparency has always been essential. Long before it became a broader industry priority, it was central to our ethos. Every step from sourcing to delivery reflects integrity, responsibility, and global best practices.

1993

SIGHTHOLDER

DE BEERS GROUP

Our traceability journey began in 1993, becoming De Beers Sightholders and gaining direct access to a highly regulated rough supply. This removed intermediaries and our enhanced control over quality and ethics.

2003

A decade later, in 2003, we embraced the Kimberley Process as India joined the initiative, further reinforcing our commitment to sourcing only conflict-free diamonds certified to global standards. As a De Beers partner since the early 2000s, we've consistently upheld their Best Practice Principles, reflecting our commitment to ethics, human rights, sustainability, and community welfare.

2012

In 2012, we deepened our commitment to responsible sourcing by partnering with Rio Tinto, the world's second-largest metals and mining corporation. This strategic alliance expanded our access to rough diamonds while advancing transparency, sustainability, and community welfare. That same year, we earned Responsible Jewellery Council (RJC) certification further affirming our dedication to integrity and accountability across the value chain. Together, these milestones continue to guide our mission to deliver diamonds with trust and authenticity.

2014

In 2014, we patented one of the industry's first ERP systems to track every diamond, regardless of size, throughout the supply chain. This digital backbone enabled provenance-specific processes, preserving origin and earning us recognition for tailor-made programs supporting natural diamond traceability. This capability has allowed KP Sanghvi to partner with luxury retailers and maisons to share the rare and ethical journey of natural diamonds with consumers.

周大福

CHOW TAI FOOK

2016

In 2016, we partnered with Rio Tinto and Chow Tai Fook, one of Southeast Asia's largest luxury retailers with over 7,000 stores, for a highly successful origin program centered on brown diamonds from the Argyle Mine. We aligned with Rio Tinto's Chain of Custody Initiative, a fully audited, pioneering program that ensured complete traceability from Australia's Argyle mine to market. As one of the first to certify authenticity, it significantly boosted consumer confidence and redefined the narrative around natural diamonds in the region.

2018

In 2018, we joined the Forevermark network, introducing uniquely inscribed tracked diamonds to India and the Middle East.

FOREVERMARK

2020

In 2020, we extended this success to Canada's Diavik Mine with the launch of the

Diavik Sourced program, which received a tremendous response across Europe, the USA, and Australia.

2021

In 2021, we collaborated with De Beers on the early rollout of its Code of Origin program for global markets. The initiative, now known as Origin Story, highlights each diamond's journey through advanced technology. These efforts reaffirm our promise to deliver diamonds that are ethically sourced, transparently traced, and trusted for generations.

2023

Our journey toward unmatched transparency begins with technology driven trust. In 2023, we adopted De Beers' Tracr, a Forbes Blockchain 50 platform that tracks each diamond's journey using a unique digital ID on a tamper-proof blockchain platform.

2025

DiaDNA

In 2025, we introduced DiaDNA, a molecular tagging innovation using AI technology for diamond paternity testing, raising traceability standards to new levels. Backed by RSM audits and global partners, we deliver diamonds rooted in sustainability, ethics, and trust.

At KP Sanghvi, our legacy of trust drives us to redefine industry standards. We deliver diamonds with unmatched authenticity, ensuring a sustainable future for all. While preserving nature's beauty, we harness technology to protect and trace each gem, ensuring a sustainable future.

KP Sanghvi Jewelry Achieves LEED PLATINUM CERTIFICATION

At KP Sanghvi Jewelry, craftsmanship meets innovation. By blending traditional skills with advanced technology, we don't just create fine jewelry—we set new standards. This commitment to excellence and responsibility has now earned global recognition.

We're proud to share that our Jewelry Manufacturing Unit in Seepz, Mumbai, has been awarded the LEED Platinum certification by the U.S. Green Building Council (USGBC) the highest standard in green building excellence. This places us among a select group of jewelry manufacturers worldwide to receive this honour.

Sustainability & Waste Reduction

95% waste recycling, including organic, plastic, paper, and e-waste, along with green cleaning and eco-friendly practices

Renewable Energy

Powered by 100% renewable energy via RECs from a 10 MW solar plant enough for 860 homes annually.

Air Quality

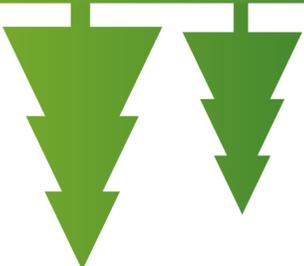

Efficient and Healthier workspaces with 30% more fresh air, reducing CO₂ levels from 2000 ppm to 800 ppm.

Water Conservation

Rainwater harvesting and efficient fixtures saving 1.3 million litres annually equivalent to providing drinking water for 5500 people.

CELEBRATING WORLD ENVIRONMENT DAY

Creating a Greener Tomorrow, Together

At KP Sanghvi, sustainability isn't a choice—it's a way of life. Rooted in responsibility and compassion, our commitment to the planet extends far beyond business. Every step we take is guided by the belief that true progress uplifts nature, supports communities, and protects all living beings.

Water: Every Drop Matters

In regions where water is scarce, we've taken conscious steps to preserve this precious resource. Through rainwater harvesting and check dam systems, we now conserve over 250 million litres of water annually. These efforts support local ecosystems, nourish communities, and ensure water security for future generations

From Barren to Biodiverse

What began as a single act of intent has blossomed into a growing green movement. By planting over 300,000 trees, we're helping restore degraded land, improve air quality, and revive biodiversity, creating a healthier, more resilient planet.

Where Compassion Meets Conservation

Our animal sanctuary is home to more than 6,000 rescued animals—from abandoned cattle to injured birds—each receiving care, dignity, and a second chance at life. With a dedicated veterinary team and an on-site hospital, the initiative offers both healing and hope. Our efforts have been recognized by the Forest Department with a Certificate of Appreciation for Wildlife Protection.

At KP Sanghvi, we believe that when we nurture nature, nature nurtures us in return. On this World Environment Day, we reaffirm our pledge—to keep giving back to the planet that gives us everything.

Because sustainability is not a milestone it's our way forward.
