60

Years

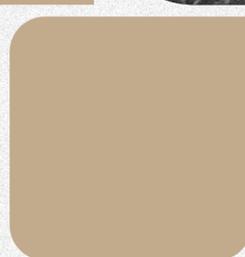

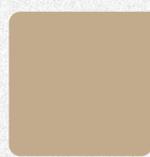

OF CRAFTSMANSHIP

Defining the Carat of Our Commitment

A Year Measured with Purpose

December, 2025

LEGACY IN MOTION

At KP Sanghvi, the true value of our work extends far beyond the diamonds we craft. Our purpose is reflected in the impact we create and the legacy we shape. As we look back on the year, we draw inspiration from a concept central to our world Carat. While traditionally a measure of weight, Carat also evokes value, meaning, and significance. For us, it embodies the weight of our commitments, the value of our choices, and the influence of our actions.

We measure this Carat, our impact, through three pillars: Empowering People & Communities, Protecting the Planet, and Pioneering Sustainable Practices. These pillars guide our vision and ensure that our purpose shines with the same clarity, brilliance, and integrity as the diamonds we create.

Empowering People & Communities

KP Sanghvi's commitment to people extends beyond our workplaces. We have built hospitals offering affordable healthcare and established educational institutions in remote regions, ensuring access where it's needed most. Our dedication to empowerment is reflected in the meaningful employment we create and the inclusive, growth-focused environment we nurture, fostering leadership and a culture where everyone can thrive with confidence and purpose.

Protecting the Planet

Our responsibility to the planet is reflected in the tangible steps we take to minimise our environmental impact. We continue to advance renewable energy across our units and strengthen water conservation through purpose-built reservoirs that support long-term resource preservation. Our commitment to nature extends to afforestation efforts that enrich biodiversity, supported by a 24x7 veterinary hospital and dedicated animal shelter that ensure continuous care and rehabilitation for injured and rescued animals.

Pioneering Sustainable Practices

Ethical practices, sustainability, and responsibility guide how we operate. Aligned with the RJC, WJI 2030, and the UNSDGs, we continually advance responsible and transparent practices across our value chain. Our green-factory initiatives follow LEED Platinum certifications, the highest green building certification globally, helping us reduce our ecological footprint and strengthen long-term environmental stewardship. Through our alliance with Originalluxury, we further enhance traceability, gaining research-driven insights that help ensure customers can trust the journey of every product we deliver.

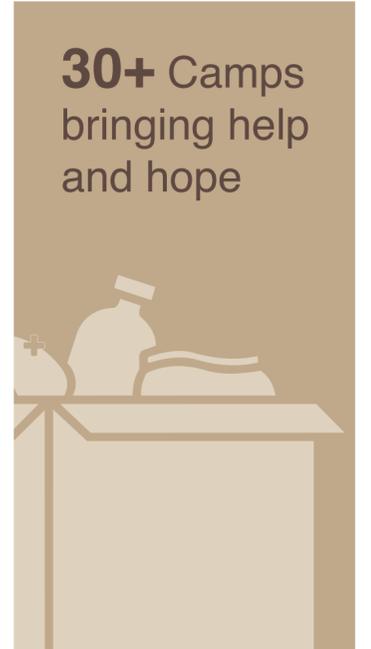

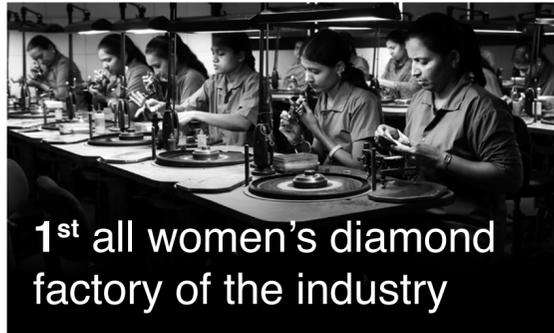

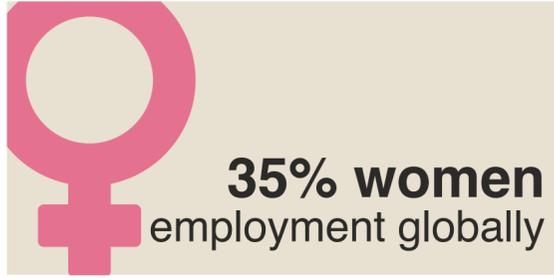

Looking Ahead

A Future Measured with Purpose

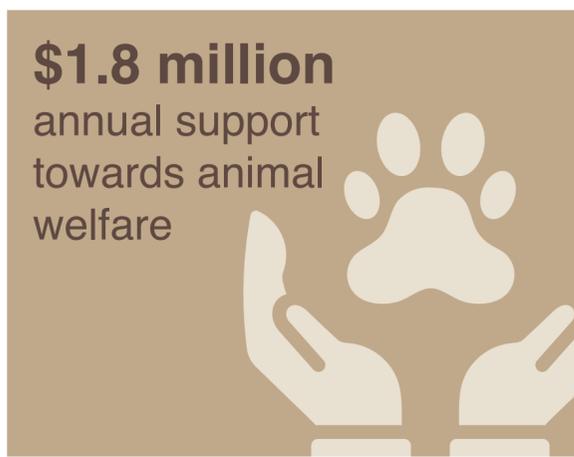

As we look toward the future, we know that our Carat will continue to evolve. We will remain steadfast in our commitment to sustainability, ethics, and employee empowerment, ensuring that every step we take is aligned with our values.

Our focus on partnerships and collaborations will continue to be a key driver of our impact, as we work to build a more ethical, transparent, and sustainable diamond industry. The next year promises to be one of growth, innovation, and opportunity, as we take our Carat to new heights, always carrying it with purpose and responsibility.
