

Dear Stake Holders,

KP Sanghvi & Sons is proud to announce yet another milestone in our sustainability journey. **Our Diamond & Jewelry Manufacturing Unit in Ichapore, Surat**, has been awarded the prestigious **Platinum LEED certification** by the U.S. Green Building Council. This marks the second time KP Sanghvi has achieved this recognition, following previous certification for our Flagship Diamond Manufacturing Facility in December 2024.

What does it take to push the boundaries of sustainable excellence?

At KP Sanghvi, sustainability isn't just a commitment—it's a responsibility. **Achieving LEED Platinum—the highest level of green building certification** reflects our dedication to minimizing environmental impact while enhancing efficiency and well-being. Here's how we're making an impact:

- 1. Revolutionizing Water Conservation (SDG 6 & 11) :** We conserve **9.3 million liters** of water annually through advanced water management initiatives—equivalent to providing drinking water for **20,000 people**. Rainwater from 100% of impervious surfaces is directed to our campus pond, treated, and reused for landscaping and sanitation.
- 2. Enhancing Air Quality for Well-being (SDG 3 & 11) :** We supply **30% more fresh air** than ASHRAE standards, reducing CO₂ levels from 1950 ppm to 750 ppm, ensuring a healthier and more productive workspace.
- 3. Advancing Renewable Energy & Efficiency (SDG 7 & 13) :** Our **120 kW solar PV system** helps offsets energy use, while 100% LED lighting, high-performance glass, an advanced HVAC system, and smart BMS optimize energy consumption with regular audits.
- 4. Pioneering Waste Reduction & Circular Economy (SDG 12) :** **95% of all waste** (organic, plastic, paper, e-waste) is recycled, significantly reducing landfill contributions and reduce our environmental footprint.
- 5. Leading the Way in Sustainable Transportation (SDG 11 & 13) :** Over **70% of employees** within 10km commute via electric or fuel-efficient two-wheelers and company buses, cutting carbon emissions and help support sustainable urban mobility.
- 6. Innovative Heat Island Mitigation (SDG 11) :** High-SRI materials, light-colored pavers, and native landscaping on the roof and non-roof surfaces help us reduce heat absorption.
- 7. Setting New Benchmarks with Sustainability Policies (SDG 12) :** We implement green policies for housekeeping, recycled paper, pest control, and organic food procurement, extending sustainability to daily operations.

At KP Sanghvi, every achievement paves the way for the next. Our second LEED Platinum certification reaffirms our commitment to responsible luxury, blending sustainability with innovation. As we move forward, we stay dedicated to a greener, healthier, and more resilient future.

One more milestone down, a lifetime of commitment ahead!

With Regards,

Kishore Sanghvi,
Chairman
