

Dear Stakeholders,

KP Sanghvi & Sons is proud to share another significant milestone in our sustainability journey. **Our Jewelry Manufacturing Unit in Seepz, Mumbai**, has been honoured with the **LEED Platinum Certification** by the U.S. Green Building Council (USGBC) the highest recognition in green building standards. Only a select few jewelry manufacturers across the globe achieve this distinction, and KP Sanghvi is proud to be one of them.

What does it take to lead the future of sustainable Jewelry manufacturing?

At KP Sanghvi, sustainability is not a checkbox, it is a core value that drives our decisions, designs, and daily practices. Here's how we're making a lasting impact:

- **Energy Efficiency & Renewable Power (SDG 7 & 13):** Our facility runs entirely on Renewable Energy Certificates (RECs) from a 10 MW off-site solar installation, enough to power 860 homes in India annually. Combined with 100% LED lighting, high-performance glazing, and a smart HVAC system, we significantly reduce our carbon footprint through clean energy and advanced efficiency.
- **Healthier Workspaces (SDG 3 & 11):** We prioritize indoor air quality by supplying 30% more fresh air to regularly occupied spaces, effectively reducing CO₂ levels from 2000 ppm to 800 ppm, a key factor in creating a more efficient and healthier work environment.
- **Water Conservation & Resilience (SDG 6 & 11):** 100% of rainwater is harvested through advanced systems, & water-efficient fixtures save 1.3 million liters annually, equivalent to providing drinking water for 5,500 people.
- **Sustainable Resource Management (SDG 12):** Over 80% of our employees use public transport, bicycles, or shared mobility, significantly reducing transportation - related emissions.
- **Affordable and Clean Energy (SDG 7):** We divert 95% of our on-site waste - including organic, paper, plastic, and e-waste - for recycling, significantly reducing landfill use. Our sustainability policies support eco-friendly practices like using green cleaning products, recycled paper, sustainable pest control, and organic food. By choosing environmentally responsible suppliers, we reduce our impact and promote a healthier workplace.

Achieving LEED Platinum certification is not our final goal - it's a significant milestone in our continuous journey toward a more sustainable, resilient, and inclusive future. At KP Sanghvi & Sons, we are committed to creating lasting, positive change - one mindful choice at a time.

Here's to building a greener legacy - for today, and for generations to come.

With Regards,

Kishore Sanghvi,
(Chairman)
